

ArdacOM Insider

As we have witnessed from the recent announcements, the latest service innovation which the mega-carriers will be vying for your subscribers is Voice-To-Text (V2T) services.

It is imperative that smaller carriers respond to this game changing application with a cost effective offering, with more advanced features, which can be quickly deployed.

2meSM Messaging - fully automated, direct delivery voice messaging service.

The 'in-network' solution which does NOT require integration with legacy voicemail.

MetroPCS offers V2T service to its 6.6 million subscribers

April 6, 2010. MetroPCS Communications, the fifth largest facilities based wireless carrier in the United States is the first national carrier to utilize a fully

automated voice mail-to-text service. This feature automatically converts a voice mail message to text and sends the content as an SMS or email

message eliminating the need to dial in and listen to voice mails. Like ArdaCOM, MetroPCS chose Yap's speech recognition platform for the voice transcription.

Fully automated Voice-to-Text messaging

Automated conversion of voice mails to text is the biggest innovation to voice mail in decades. ArdaCOM's 2me Messaging service takes advantage of advances in automated speech recognition,

offering a service that ensures privacy and much faster conversions than human-assisted solutions.

2me messages can be read, responded to,

2me Messaging—the Voice-to-Text solution for the smaller carrier

It is essential that smaller carriers capitalize on the impending media blitz around the new voice-to-text services by launching a V2T service in their own networks.

ArdaCOM's 2me Messaging service can be deployed quickly, cost effectively and has more advanced features than the services currently offered by larger wireless carriers.

Act now to launch 2me Messaging rather than waiting and settling for "me too" messaging in the future.

forwarded, stored and searched just like an email. By converting messages to text and sending them as email or SMS, 2me Messaging becomes a convenient real-time communication tool akin to instant messaging and email.

2me Messaging service runs in the carrier's network on

ArdaCOM Simple Message Delivery application.

Together, ArdaCOM's Simple Message Delivery application and 2me Messaging service solve the key user frustrations of legacy messaging services while simultaneously eliminating the costs of integration, licensing and message storage associated with traditional voicemail solutions .

ArdaCOM— We are on the GROW again!

On March 1st, ArdaCOM moved their Operations, Sales, Marketing, and Product Development to 5655 Peachtree Parkway, Suite 103, Norcross, GA 30092.

According to Bruce Bales, company president and CEO, nationwide carrier interest in ArdaCOM's 2meSM Messaging service has necessitated the company to again expand operations to prepare for accelerated commercial deployments.

"Our new location is part of our strategic plan," said Bales. "We are excited about

the growing interest among carriers for our applications, and this move makes it possible for us to better serve our customers."

The ArdaCOM office is conveniently located in northeast Atlanta with easy access to I-85 and I-285.

Directions:

Visitors traveling on I-285 should take Exit 31 to Peachtree Industrial Boulevard NE, travel approximately 6 miles and turn left onto Scientific Drive NW.
